Importance of a sustainable and future-oriented publication system for scholarly books.

Open Access for maximizing national and global visibility of publications.

International quality standards in editorial procedures.

Standardised metadata and technological interoperability.

Survival of scholarly books published by Croatian publishers facing unique challenges (small market, limited audience, Croatian language, small number of scholars).

Goals of the Initiative:

Community to exchange knowledge and best professional, organizational, and technological practices.

Common national infrastructure & access point for Croatian OA books: open, non-profit, transparently overseen by the academia.

A financial support system to ensure the sustainability of book publishing within a small readership.
