DIAMAS

CRAFT-OA

eosc

The Extensible Quality Standard for Institutional Publishing (EQSIP), developed by DIAMAS, seeks to ensure the quality and transparency of governance, processes and workflows in institutional publishing.

EQSIP addresses the seven core components of scholarly publishing outlined in the Diamond OA Action Plan and subsequently revised and modified by the DIAMAS project team.

The EQSIP is being developed in two stages: EQSIP 1.0 and EQSIP 2.0.

Projects

PALOMERA, CRAFT-OA and other projects supporting Diamond OA will help DIAMAS in EQSIP testing and dissemination.

EQSIP 2.0
will take into account community feedback and will be adjusted to specific scholarly disciplines, regions, and languages

EQSIP 1.0

Funding
- Principles of transparency
- Long-term vision

Visibility, Indexation, Communication, Marketing and Impact

Equity, Diversity and Inclusion (EDI)
- Equity, Diversity and Inclusion
- Inclusive / Accessible website, content and metadata
- Multilingualism

Ownership and governance
- Transparent ownership structure, organisation, and community governance
- Editorial freedom
- Content ownership
- Relationship between the editor and the Institutional Publisher
- General Terms and Conditions (the use of the infrastructure or platform)
- Repository deposits
- Publication and sharing of negative scientific results
- Incentives and rewards

Open Science Practices
- Open Access and Open Science policies
- Open Science compliance
- Authors' rights, Intellectual Property Rights and licensing
- Research data sharing and data availability policies
- Research protocols and methods sharing and publishing
- Open research software
- Open peer review
- Preprints

Editorial Quality, Editorial Management and Research Integrity
- Editorial management
- Evaluation process
- Research integrity

Technical Service Efficiency
- Software and interoperability
- Metadata
- Content formats and preservation
- Platform functionalities

Analysis of the current best practices
EQSIP 1.0 is based on an analysis of the current best practices. It outlines a tentative ideal quality level in Diamond OA institutional publishing.
